

# Dr. Vicente Santoni of the Medical Faculty, Paris,

**Now Practicing in Ponce, Porto Rico, Says:**

*The undersigned, Dr. Vicente Santoni, of the Medical Faculty of Paris, practicing in Ponce, Porto Rico, certifies:*

*"I have been using the preparation known as Peruna for some time, for catarrhal diseases, always obtaining excellent results. It is a good preparation and I will always use it in cases for which it is adapted."*

**Dr. V. Santoni, Ponce, P. R.**

**Prescribes Per-u-na.**

Testimonial of Dr. Esteban Vidal y Rios, office Ponce, Porto Rico. Doctor of Medicine and Surgery of the University of Madrid, honorary member of the Faculty of Barcelona, Catalonia, Spain. Has practiced in the hospitals of Paris and has been admitted to the bar of Porto Rico.

"I certify that I prescribe Peruna, a remedy for pulmonary diseases, manufactured by the Peruna Drug Co., of Columbus, Ohio, U. S. A., and that I have been surprised by the quick, sure results and its good pharmacological formula." **E. VIDAL Y RIOS, Ponce, P. R.**

## Per-u-na in Hot Countries.

In some countries the atmosphere is a natural tonic. Low temperature, high altitude, with an atmosphere rich in oxygen, are invigorating to the people. Such people are vigorous of body, quick in action, and enterprising. Other countries are not so fortunate. High temperature, low altitude, little oxygen, and the atmosphere naturally depressing.

Tonics become almost a necessity of the everyday life. A scientific tonic in a large degree mitigates the untoward effect of a depressing climate.

A great many years ago Dr. Hartman devised Peruna. Its manufacture has been under his watchful care ever since.

To make of it a reliable and safe tonic which could be taken any length of time without producing a drug habit has been the ambition of Dr. Hartman.

That he has succeeded in bringing Peruna up to this high ideal is apparent by the world-wide reputation which it has attained. Peruna is a tonic which is applicable in all depressing states of the system. It may be used by those recovering from acute ailments, or those who are depressed by climatic influences.

The following wholesale druggists will supply the retail trade: **BENSON, SMITH & CO., Honolulu, Hawaii.**

## GOVERNOR FORWARDS PROOFS OF REPORT

The revised proofs of the annual report of Governor Fear to the Secretary of the Interior went forward to Washington by the Albatross this morning. The report deals at length with the problems affecting the Territory and with it is an abstract which was prepared by Governor Fear on the request of the Secretary of the Interior and will be embodied in that official's report to Congress.

Governor Fear completed his report in August and received the proofs from Washington a short time ago. A number of additions were made by Governor Fear through the obtaining of data that was not ready when the first draft of the report was finished and these changes were incorporated in the proofs.

## NO JOY IN LIFE FOR KANSAS BOY

States Put Him Under Some Ethical Rules as Result of Activity of Board of Education.

TOPEKA (Kans.), September 12.—Beginning tomorrow, a great majority of the 12,000 schools will open in Kansas, when a new order promulgated by State Superintendent Fairchild and the State Board of Education will go into effect. Ethical rules are to be taught in all the schools of the State. This subject is not in the regular course of study, but it has been put there by a sweeping order from Fairchild.

This new order of things in Kansas schools may appear commonplace to the grown-up people, but to the youngster it means the curtailment of many improper liberties he has enjoyed all these years. It means he can no longer play marbles for keeps nor throw snowballs at grown people who happen to pass his way. Putting sulphur on the schoolhouse stove, dropping powder down registers, stealing apples and watermelons, tying tin cans to the tails of dogs, pulling girls' hair, trading knives "sight unseen" and all other pranks and jokes which have made life of the schoolboy one of unalloyed joy must be laid aside in Kansas.

Under the auspices of the National Red Cross there is to be an inter-company military competition in the application of first aid to the injured at Wilkesbarre, Pa., Oct. 2.

## MRS. DREIER WANTS DOWER'S INTEREST

**Wants Court Order Directed To Executors**

A petition for administration of dower has been filed by Kinney, Ballou, Prouser & Anderson, attorneys for Emma Dreier. The petition recites that Cecil Brown and F. A. Schnoer qualified as executors of the will and that although six months have elapsed since the death of August Dreier, the widow has not as yet been assigned her dower in the estate although formal demand has been made.

The petition asks that commissioners be appointed for the purpose of appraising the value of Mrs. Dreier's dower interest, reporting their findings to the court, which is then asked to direct the paying over of the dower interest. Annexed to the petition is an inventory showing the personal property of the estate to be valued at \$53,682.18, and the realty holdings at \$72,828.

## IMPORTANT SESSION MERCHANTS' ASS'N

A very important meeting of the Merchants' Association will be held this afternoon at 4 o'clock. George H. McCollan will address the meeting, and other matters of great importance will come before the Association. All members are urged to attend the session.

## REAL ESTATE TRANSACTIONS.

## ROYAL BAND IN SYMBOLIC CONCERT

Amidst the gaiety of the reception last night the Royal Hawaiian Band played for four hours on the deck of the "U. S. S. Honolulu," forecasting the time when a real man-of-war, christened after the capital of Hawaii, will be welcomed with the music and flowers of Hawaii's people. That the old and famous band of the Hawaiian Kings, which has kept its place in the history of the islands, should, surrounded with the magnificence of a navy reception, play on the mock deck of a mock battleship with the grim reality of the real thing looming above it, is symbolic of the time when America's power will be greeted by the newest and most beautiful addition to its royal territory, and a real "U. S. S. Honolulu" will help uphold the honor of the Stars and Stripes.

Joe Skibon, John Ventura and Henry Allen were fined three plunks with frills apiece this morning before Judge Andrade for indulging too much for all that makes life worth living in the bull pen. Kapua (w) was also requested to pay the same amount to the general upkeep of the city and county for the same reasons.

August Ahrens, manager of Kukuhele plantation, is in town on a short business trip.

Colorado has received \$5,410 as a tax on the estate of the late Gen. W. J. Palmer, founder of Colorado Springs. It was the second largest tax ever paid the state.

In the Federal court at Marquette, Mich., E. T. Larson, former cashier of the defunct First National bank of Ironwood, Mich., pleaded guilty to embezzlement.

Governors and merchants of four states will attend the convention of the Ohio Valley Improvement association at Cincinnati Oct. 14 and 15.

## SOURCE OF SUPPLY.

"You haven't got nerve enough to make a success of anything," said the village grocer to the shiftless party. "What you need is more sand."

"Guess you're right old man," joined the s. p. "and if sand is what I need sand is what I'll have. Gimme a quarter's worth of sugar."

## HOW NAVY BOYS SAVED COQUIMBO

**CHILEAN TOWN OWES EXISTENCE TO SAILORS.**

Men of Second Division of Pacific Fleet, Now Here, Waged Two Hours' Fight Against Fire Threatening City.

Filed away in navy chronicles among the unnoted accounts of the army and navy in time of peace, of the heroism which the public never recognizes, coming, as it does, without the excitement and glamor accorded to it in war, are the accounts of the manner in which the city of Coquimbo, Chili, was saved by the boys of the Second Division of the Pacific fleet, now here.

It was while the fleet was off that port in January of this year that the aid of Uncle Sam's sailors in fighting a sudden and furious fire that broke out in the hotel, saved the entire town, dried by the sun and untouched by rain, from complete destruction by the flames.

In the report of Captain Fiske, who directed the fire fighters, to Admiral Sebree many of the officers and men are mentioned for conspicuous bravery, and George H. Wheeler, ship's fitter, first class, and William Gowan, boatswain's mate, second class, have been awarded the gratuity of \$100 and the medal of honor.

It was seven o'clock in the evening when a large fire suddenly blazed out in the city, and Captain Fiske sent Ensign Rees into the city to offer assistance in case it was needed. The chief of the fire department sent back word that he needed all the assistance that could be given.

The fire and rescue parties at once started for shore, and Captain Fiske took charge of them. They found the Hotel Royal, the largest in Coquimbo, a mass of fire. A party of American sailors who were found operating on a three-foot ledge, part of the burning second floor, were ordered into the adjoining house, as the ledge would soon have fallen.

Lieutenant Commander Charles F. Hughes had charge of this party and had managed to train three or four lines of hose on the fire from that point of vantage, unstable as it was. There were thirty men in Mr. Hughes' party, and, operating in the house that abutted on the rear of the hotel, they kept the fire from spreading in that direction. Had he fire spread to this house it would have spread beyond control the full length of the waterfront. Mr. Hughes himself took charge of the party and often risked his own life by pulling down burning rafters on himself. He happened to be on the ledge when it gave way and owed his life to the fact that the fire beneath had partly burned out. The fight waged by himself and his men on this side of the fire lasted two hours without intermission.

Meanwhile Captain Fiske had thrown a cordon of men around the fire and drove all except the actual fire fighters from the scene, taking precautions against pilferers.

Midshipman Harry A. McClure was found by Captain Fiske on the roof of the one-story house that abutted on the rear of the hotel and ordered him and his party to keep away from the burning thirty feet of wall that rose above them. McClure managed to get two lines of hose playing from another roof and afterwards carried one to the ground and trained it on the northeastern interior of the hotel, where the fire was then the hottest.

Several times his commander had to order him back from excessively dangerous points, and on one occasion Capt. Fiske seized him by the collar and pulled him back to the street from a burning window—he was trying to enter with a line of hose.

Lieutenant Commander Hughes was assisted by Midshipman Frank Russel during his fight with the fire in the rear, and the latter carried the orders of his superior to the most dangerous points under extremely perilous conditions.

Midshipman Raleigh E. Hughes was the immediate assistant of Captain Fiske during the fire and at one time had to enter a house and break open the door of a private room in the hard fight against the destructive flames.

Close to the southern edge of the roof was a double tank, which it is rumored contained either oil or gas. As it was absolutely essential to verify the rumor, William Gowan climbed to the top of the upper tank through the intense heat, calmly disregarding the report of excited latins that it was full of oil. Investigation showed that there was nothing but water in the tank, and, breaking the pipe, it flowed down on the fire beneath.

The Chileans expressed the greatest admiration and amazement at the way the Americans forced the fire under control, and parties from the British gunboats Shearwater and

## CANCER MAY CHANGE MANTO HIGHER BEING

**AGENT FOR EVOLUTION OF EARTHLY VERTEBRATES**

New Form of Life Is Found in Cancer Cell — Disease Is Not on Increase, Not Infective and Not Hereditary.

BUDAPEST, Sept. 1.—Is cancer the agent which nature has chosen for the final extinction of the human race, or its transmission, by a process of evolution, into some other and higher form of life, as yet unsuited to present conditions on the globe? This is the question scientists are asking after listening to the strange revelations just made to the Sixteenth International Medical Congress here by Prof. E. F. Bashford of London, director of the Imperial Cancer Research, which was established by royal authority in 1902 to carry on systematic investigations in regard to this mysterious disease.

Cancer stands revealed in the experiments of the Imperial Cancer Research, not as a disease, in the ordinary accepted meaning of the term, but as some new form of life. There is no cancer germ. On the contrary, the cancer cell is a living cell, containing the power within itself of apparently indefinite proliferation, or self perpetuation and expansion. Moreover, it is not an embryonic cell, but is a highly specialized cell.

The growth of cancer, the director tells his learned colleagues, is entirely and essentially different from the growth of embryonic tissues, analogies with which were natural so long as the growth of cancer was put an end to by the death of individuals. This growth is a unique biological phenomenon, disobeying all the laws of growth by which organisms and organs attain to their specific dimensions. The cancer cell possesses fixed characteristics.

What causes a normal cell to evolve or change into a cancer cell? This is the great mystery.

## Experiments on Mice.

Cancer, the congress was told, has no analogy with any known form of infective disease. Out of 200,000 mice handled by the Imperial Cancer Research, not one of them communicated the cancer to any other one. Nor did any one handling the mice develop cancer though they spent days in the rooms in which 10,000 cancerous mice were kept in colonies.

Is cancer limited to human beings? No, says Prof. Bashford. It is common, contrary to the general belief, in all vertebrates—in dogs, cats, mice, birds, frogs, fish, every animal that has a backbone. The trout is particularly liable to cancer. It is apparently as prevalent in savage and semi-civilized as in the most highly civilized races of men. Can the cancer lesions be reproduced, experimentally, and can cancer be transplanted from one animal to another? Yes, says Prof. Bashford. It has been done in tens of thousands of cases by the experimenters in the Imperial Cancer Research Laboratories, especially from mouse to mouse.

Is there any age-incidence in cancer? Yes, the director tells the congress, and it holds good not only for man but for all other vertebrate animals. The liability to the disease is greatest in early middle life.

Is cancer on the increase? That is doubtful, says Bashford. The apparent increase, he says, is due to more careful diagnosis. The liability to the disease is somewhat greater in males than in females.

## Not Contagious or Infectious.

Is cancer hereditary or congenital? That question, says Bashford, has not been settled either one way or the other for man. The experiments with mice have so far afforded no evidence in favor of inherited or congenital influence. In the first 400 mice bred of cancerous parents, which lived over six months, 30 cases of cancer appeared. But its incidence obeyed the general law of age-incidence, not developing at birth. There was, therefore, says the director, no satisfactory indication of an inborn predisposition. Cancer and the predisposition to cancer, Bashford says, may be regarded from the mouse experiments, as being acquired, and not hereditary or congenital. The disease is not contagious or infective, and there is

Algerine and the Chilean cruiser Chacabuco, who were also on the spot, were cast into the shade by the exploits of Uncle Sam's boys, although they took an active part in the saving of the town.

In his report to the Commander in Chief, Captain Fiske mentioned Lieutenant Commander Hughes for extraordinary heroism in time of peril; Midshipmen McClure and Russel for conspicuous valor, and Midshipmen Hughes and Carpenter Mead for extraordinary ability.

It was on Captain Fiske's report that Wheeler and Gowan were awarded the medals of honor.

## Whitney & Marsh, Ltd.

**Our New Skirts Are Here**

**Great Annual Clearance Sale of Shirt Waists**

**Begins on FRIDAY NEXT, Oct. 1**

no such thing as a cancer epidemic. Nor are there "cancer houses" where the occupants get the disease from the house.

No serum which will cure cancer or render man immune has yet been found, Bashford asserts. He states his own observations have been corroborated by those of Dr. Flexner, director of the Rockefeller Institute in New York, to the effect that the serum of immune animals (animals which for one reason or another have resisted cancer) is not more injurious to the cancer cell than normal serum.

**VETERANS OF SPANISH WAR NAME OFFICERS.**

TACOMA, Wash., Sept. 10.—After voting to drop the word "United" from the official name, the Spanish War Veterans chose Denver as the encampment city for 1910, and elect-

ed Col. Edward J. Gibbon of Wakefield, Mass., commander in chief at the closing session of their sixth national convention here today. Mrs. Ida M. Galloway, Washington, D. C., was named president-general by the Woman's Auxiliary, and Napoleon White, Boston, Mass., selected leader of the Military Order of the Serpent. Chicago and Los Angeles, bidders for next year's encampment, withdrew in favor of Denver at the last minute. Washington and Montana ineffectually fought Denver to the end.

New England delegates controlled the convention from the outset and checked the efforts of Washington to make the Grand Army of the Republic veterans honorary members of the fraternity Tomorrow the Spanish War Veterans and their ladies will celebrate their special day at the A.-V.-P. exposition.

## Your Own Price In Clothing

**Beginning THURSDAY, Sept. 30th, and continuing for ONE WEEK ONLY.**

**Here are a few prices at the reduced figures**

Lot 8669—Formerly \$ 9.00.....	Reduced to \$ 6.75 a suit
Lot 8624—Formerly 10.00.....	Reduced to 7.50 a suit
Lot 1531—Formerly 12.00.....	Reduced to 9.00 a suit
Lot 1045—Formerly 13.50.....	Reduced to 10.15 a suit
Lot 8735—Formerly 14.00.....	Reduced to 10.50 a suit
Lot 1057—Formerly 15.00.....	Reduced to 11.25 a suit
Lot 1034—Formerly 16.00.....	Reduced to 12.00 a suit
Lot 21880—Formerly 17.00.....	Reduced to 12.75 a suit
Lot 21900—Formerly 19.00.....	Reduced to 14.25 a suit
Lot 8837—Formerly 20.00.....	Reduced to 15.00 a suit
Lot 20350—Formerly 22.00.....	Reduced to 16.50 a suit

We also have a fine line of straw hats at the following prices: 75c, \$1.00, \$1.25, \$1.50, \$1.75, \$2.00, \$2.50, and a superior line of felt hats at \$1.25, \$1.50, \$1.75, \$2.00, \$2.50 and \$3.00.
